

Yonatan Habtamu

Mern Stack Web Developer

Professional Summary

I'm a full-stack web developer who loves building things for the web. I work with both front-end (what users see) and back-end (the behind-scenes logic).

Experiences

Full Stack Developer Internship

Evangadi Inc., Maryland

Sep. 2024 - Mar. 2025

Prodigy InfoTech., India

May. 2025 - June. 2025

Secure User Authentication System

- Built a JWT (JSON Web Token)-based authentication system with Node.js, Express, and MySQL.
- Implemented password hashing using bcrypt for enhanced security.
- Designed a responsive frontend with React.js for seamless user experience.

Employee Management System

- Created a CRUD-based system to manage employee records using MERN Stack (MySQL, Express, React, Node.js).
- Implemented role-based access control (Admin/User roles) for secure data handling.
- Added features like search filters, and pagination for better usability.

E-Commerce Website

- Built a full-fledged e-commerce platform with React.js (Frontend), Node.js & Express (Backend), and MySQL (Database).
- Integrated Stripe API for secure payments and Firebase for user authentication.
- Developed features like product search, cart management, order tracking.
