Yonatan Habtamu

Mern Stack Web Developer

Professional Summary

I'm a full-stack web developer who loves building things for the web. I work with both front-end (what users see) and back-end (the behind-the-scenes logic) using tools like HTML, CSS, JavaScript, React, Node.js, and Express.js. I enjoy solving problems and creating clean, functional websites. I learn quickly and take pride in writing efficient code. I'm excited to grow my skills while contributing to real-world projects.

Employment History

Full stack developer Intern, Evangadi Networks. , Maryland

Sep. 2024 - Mar. 2025

- Identify problems uncovered by testing or customer feedback, and correct problems or refer problems to appropriate personnel for correction.
- Communicate with network personnel or web site hosting agencies to address software issues affecting web sites.
- Develop and document style guidelines for web site content.
- Select programming languages, design tools, or applications.
- Develop web site maps, application models, image templates, or page templates that meet project goals, user needs, or industry standards.
- Develop or validate test routines and schedules to ensure that test cases mimic external interfaces and address all browser and device types.
- Develop databases that support web applications and web sites.
- Perform web site tests according to planned schedules, or after any web site or product revisions.
